Skills

- **Languages**: Java, JavaScript, C++, Python
- **Frameworks/Libraries**: HTML, CSS, Java Script, Node.js, React.js, Express.js, Scikit-Learn, NumPy, Pandas
- **Tools/Platforms**: MySQL, MongoDB, GitHub, Excel, Power BI, Jupyter
- **Soft Skills**: Problem-Solving Skills, Adaptability, Team Player

Projects

- **Fitness & Diet Recommendation System**: Jan 2025 – Feb 2025
  - Developed a full-stack fitness recommendation system using Vite + React, Node.js, Express, and MongoDB, providing personalized calorie, diet, and workout plans.
  - Implemented Decision Tree classification models to recommend workout routines and diet categories based on user physical metrics and fitness goals.
  - Built a Linear Regression model to predict individualized daily calorie requirements for fat loss and muscle gain.
  - Integrated machine learning models with the MERN backend via REST APIs, enabling real-time predictions and scalable system design.
  - Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, Scikit-learn, REST APIs.

- **Retail Sales Forecasting Dashboard:** Mar 2025 – Apr 2025
  - Built an end-to-end retail sales forecasting system using Python and Machine Learning to analyze historical data and predict future sales trends.
  - Performed data preprocessing and feature engineering with Pandas and NumPy, and trained Random Forest and XGBoost models for accurate sales prediction.
  - Evaluated model performance using MAE and RMSE, ensuring reliable and interpretable forecasting results.
  - Developed an interactive Streamlit dashboard with Plotly visualizations to present sales insights and future forecasts in a user-friendly manner.
  - Tech Stack: Python, Pandas, NumPy, Scikit-learn, XGBoost, Plotly, Streamlit.

Summer Training

- **SkillStone – Data Structures and Algorithms:** Jun 2025 – Jul 2025
  - Mastered the implementation and application of core data structures and algorithms in C++, developing a strong foundation in computational efficiency and complexity analysis.
  - Performed performance analysis and optimized code to improve algorithmic efficiency and resource utilization.
  - Applied DSA principles to solve complex problems, strengthening analytical thinking and structured solution design.
  - Built an interactive Sorting Algorithm Visualizer using HTML, CSS, and JavaScript to demonstrate real-time algorithm behavior.

Certificates

- Cloud Computing – NPTEL Oct 2025
- Training in Data Structures and Algorithm – SkillStone Jul 2025
- Completed “Data Structures & Algorithms” course – Apna College May 2025
- Responsive Web Design – FreeCodeCamp Oct 2023

Extracurricular

- **Community Development Program (CDP):** July 2024
  Volunteered with an NGO as part of a Community Development Program, educating underprivileged children and contributing to grassroots learning initiatives, while strengthening communication, leadership, and social responsibility skills.
- **Sports Achievement:** Nov 2017
  Secured Gold Medal (62 kg category) at the District-Level Taekwondo Championship, demonstrating discipline, perseverance, and competitive excellence.

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology(B-Tech) - Computer Science and Engineering; ***CGPA: 6.7*** *August 2023 - Present*
- **K.R Education Centre** Kanpur, Uttar Pradesh
  Intermediate; ***Percentage: 62%*** *April 2020 - March 2022*
- **K.R Education Centre** Kanpur, Uttar Pradesh
  Matriculation; ***Percentage: 70%*** *April 2019 - March 2020*
